

Introducing Powercom

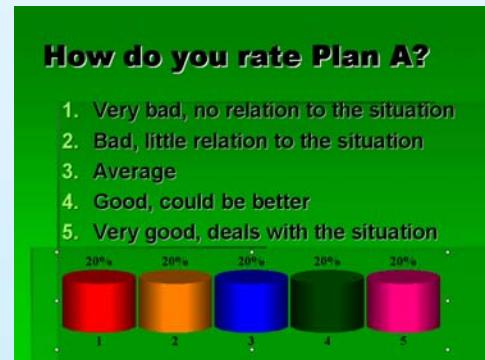

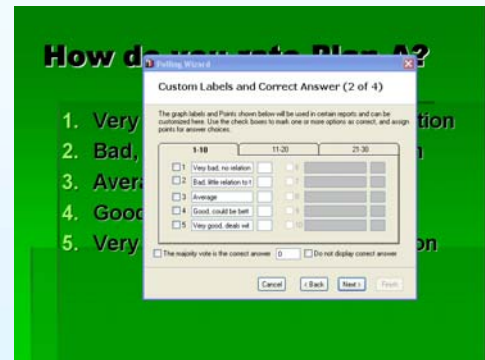

Breathe interaction into your PowerPoint presentations with Reply and Powercom....

A simple to set up and easy to use PowerPoint plug-in voting software that works with Reply Plus, Mini +, Worldwide and Mini keypads. Powercom has many easy to use features that include demographic screens; points to correct answers; fastest finger first; multiple graph types; and multiple correct answers amongst others.

Draw up your PowerPoint presentation putting the question text into the top box of the slide and the answer choices into the lower box of the slide, insert your "Poller" and set the parameters in 4 easy steps. Use pictures, video, sound and other PowerPoint features.

Run your PowerPoint presentation in the normal manner asking participants to vote at the relevant question slides.

Use demographic options show how different parts of the meeting view the same issues.

Powercom

MS Office bases reports range from general class reports through to detailed individual reports. Excel, PowerPoint, Word, JPEG and HTML pre-programmed reports cover most eventualities.

How do you rate Plan A?

1. Very bad, no relation to the situation
2. Bad, little relation to the situation
3. Average
4. Good, could be better
5. Very good, deals with the

Demographic analysis by slide "Region"

	Option A	Option B	Option C	Option D
North	1	0	0	0
South	0	4	0	0
East	0	0	1	0
West	1	0	0	2
Central	1	0	3	2
Total	3	4	1	2
